

| | | |
|----------|---|--------------|
| | CONTENTS: | |
| 1 | Activating the glutathione system of <i>EiseniaFetida</i> during exposure to contaminated silt sludge <i>Nataliya MITINA, Nina KHROMYKH, Larisa SHUPRANOVA, Inna ZUBAREVA</i> | 276 - 283 |
| 2 | Heat transfer in down flowing turbulent evaporating liquid films with developed wavy structure and co-current steam flow <i>ValentynPETRENKO, YaroslavZASYADKO</i> | 284 – 298 |
| 3 | Research on technological properties of potato cellulose for bread production <i>Tatjana SILCHU, Mariana NAZAR, Tatjana GOLIKOVA</i> | 299 – 305 |
| 4 | Nanosized titanium dioxide as an antibacterial admixture for the food packaging materials <i>IgorKOBASA, MariiaVOROBETS, LarysaARSENIEVA</i> | 306 - 311 |
| 5 | Use of emulsions in production restaurants and food industry <i>Oksana LUGOVSKA, Vasilij SIDOR</i> | 312 - 322 |
| 6 | 3-D Modeling of water flow and cooling down within the temperature range close to inversion point <i>Roman GRYSHCHENKO, Yaroslav ZASIADKO, Andriy FORSIUK, Oleksiy PYLYPENKO</i> | 323 - 328 |
| 7 | Mathematical modeling of thermal processing of meat products <i>Volodymyr PAVELKO, Serhiy HRYBKOV, Arkadiy ZASLVSYSKY, Daria DMYTRENKO</i> | 329 - 333 |
| 8 | The influence of berry puree on microbiological indicators of cheese product during storage <i>Olena GREK, Tetiana PSHENYCHNA, Olena KRASULYA, Yuliia PAKHOMOVA, Kateryna IVASHCHENKO</i> | 334 - 340 |
| 9 | The influence of proteins on the technological process of bread making with fructose <i>Vera DROBOT, Anastasiia SHEVCHENKO, Olha MARCHENKO</i> | 341 - 346 |
